Jeans for Genes Day Reminder– Friday, 25th September 2026

Dear Parent/Carers

We are excited to support Jeans for Genes Day, raising awareness and funds for children and families affected by genetic conditions.

Genetic conditions can range from life-threatening disorders to conditions that present more manageable challenges; however, they can have a significant and lasting impact on children and their families across the UK. We had an assembly on 14th September about this.

By taking part in **Jeans for Genes Day**, our school community can make a meaningful contribution. Funds raised help provide essential care, support and resources for children and families affected by genetic conditions, while also supporting vital research into these conditions.

Pupils are invited to wear jeans or denim to school on Friday, 25th September and make a £1 donation via ParentPay.

Every contribution helps provide essential support, resources and research for children affected by genetic conditions.

There is no need to buy anything new, please wear denim you already have at home.

Thank you for your support in helping us make a difference! ❤️ 👖

Kind regards,
Beauty Ohiomoba
